

HUMAN COMPUTER INTERACTION –CS351

Lab-Assignment #1 : The Human

Computer Science Department

2018-2019

Exercises #:

1- Complete

- a. Information gives knowledge that it has been seen before is _____
- b. ____ occurs when information is lost gradually but very slowly.(complete)
- c. ____ occurs when new information replaces old
- d. ____ occurs information moves from STM to LTM
- e. List three types of memory?
- f. Two types of error ____ and ____
- g. our interpretation of a physiological response to a stimuli is _____
- h. The biological response to physical stimuli is ____

2. Define Human Computer Interaction?

3. When do people start thinking?

4. stress will increase the difficulty of problem solving (T/F)

5. How do we interpret the signal of stimulus?

1.____ 2. ____ 3.____

6. Difference between slip and mistake?

7. How human interact with others?
